About me

Hello! I am a 21 year old, graduate,freelancer with highly developed skills in photography, designing and writing. With ambitious goals, I am all set to begin my career in this field. Defined as an adaptable,self-motivated and down-to-earth individual with drive to "not-be-a-common-man".

What do I want?

My passion for photography and writing is more than just getting a job in the field and doing a monotonous work to get a good salary. I am looking forward to work for an organisation which challenges my skills and allows me to continue to develop my potential.
